EDUCATION

M. D. in General Medicine. Medical Information Technology and Electronic Healthcare.

Asfendiyarov Kazakh National Medical University

📍 Almaty, KZ

SKILLS

- **Programming Languages:** JavaScript, TypeScript, Python, HTML5, CSS3
- **Frameworks/Libraries:** React, Redux, NodeJS, Express, Bootstrap, jQuery
- **Databases:** MongoDB, Oracle, SQL, NoSQL
- **Clouds:** AWS (EC2, S3, Cognito), Microsoft Azure
- **Development Tools:** REST API, Ant Design, Chrome DevTools, Mongoose, Postman, Figma, Photoshop, GIMP
- **TestAutomation/Unit:** Selenium WebDriver, Jest.

INTERESTS

- Exploring the world of web development with ReactJS, NodeJS, and ExpressJS.
- Strategizing in chess and applying problem-solving skills to robotics challenges with my son.
- Finding new ways to integrate technology with my passion for dogs, travel, cooking, and camping.
- Delving into literature, world history, and languages to inspire my coding creativity.

CAREER OBJECTIVE

Full-stack developer with 6+ years of experience creating and managing responsive web applications and RESTful APIs. Coding on ReactJS and dreaming on ReactJS. Help companies build complex web applications serving 1,000,000 + users with React and modern technologies.

WORK EXPERIENCE

Full-Stack Developer

LASTH

📅 January 2020 - current

📍 Los Altos, CA (Remote)

- Wrote 200+ unit tests to verify the functionality of user interfaces, back-end processing, connectivity, and database interactions.
- Developing web applications using HTML, CSS, and JavaScript frameworks such as React, increasing the performance of a single-page application by 15% (~\$180,000 in new monthly revenue).
- Developed 30+ new software solutions by analyzing system performance standards.
- Maintained 8+ systems and applications as Tier 2 support (break-fix and data changes).
- Collaborate with other developers on a team to work on a project using Git as the version control system. Increasing productivity by 6%.

Full Stack Developer

Eurasian Bank

📅 July 2018 - May 2019

📍 Almaty, KZ

- Developed a task management software system for a Eurasian Bank, which resulted in workflow optimization and increased productivity by 18% (~\$90,000 in new monthly revenue).
- Developed an interactive web application utilizing JavaScript, HTML5, CSS, JSON, and ReactJS, and integrated Restful APIs, increasing the performance of a single-page application by 17%.
- Built a clean, modular web-based React-Redux-Node.js application in an agile and changing environment. Which increased performance compared to previous versions by 10%.
- Revamped a new application by integrating Interbank Clearing System (ICS) payment functionality, leading to a 13% surge in customer acquisition and an extra \$970,000 in monthly revenue.

Frontend Web Developer

Eurasian Bank

📅 March 2016 - June 2018

📍 Almaty, KZ

- Developed and maintained documentation for user interfaces, which resulted in workflow optimization and increased productivity by 10% (~\$90,000 in new monthly revenue).
- Developed an interactive web application utilizing React, Redux, and Node.js, increasing the performance of a single-page application by 13% (~\$65,000 in new monthly revenue).
- Developed new features for the website, such as account opening forms, loan applications, and online banking login pages. This increased the number of new bank customers by 9%.
- Developed 10+ new application features and distributed services that support high-scale applications.
- Using Git to manage and deploy updates to live websites or applications. By improving the quality of the final product by 11%.
